

AIR  
SPIRALO®

VENTILATION DUCTS & FITTINGS

## KEN-LOK Fittings

### Application

Modern ventilation systems are characterised by higher demands on air tightness saving energy and the need for quick installation.

*A ventilation system installed with Spiralo ducts and KEN-LOK fittings complies to air tightness class ATC2 and is easy to install*

### Unique features

- Air tightness class ATC2
- Quick and easy installation
- Less mounting material (*no tape*)
- Ideal for visible places

### KEN-LOK fittings

**With ease a higher air tightness**

## Through the KEN-LOK program to air tightness class ATC2

KEN-LOK implies:

- Double lip rubber seal at each side of the fitting
- The double lip rubber seal is integrated with the 'Soft-Edge' technology (rolled over edge)

The KEN-LOK material resists temperature differences of -30° up to 100°C which makes it suitable for application in various systems. The material is also chemical-proof.

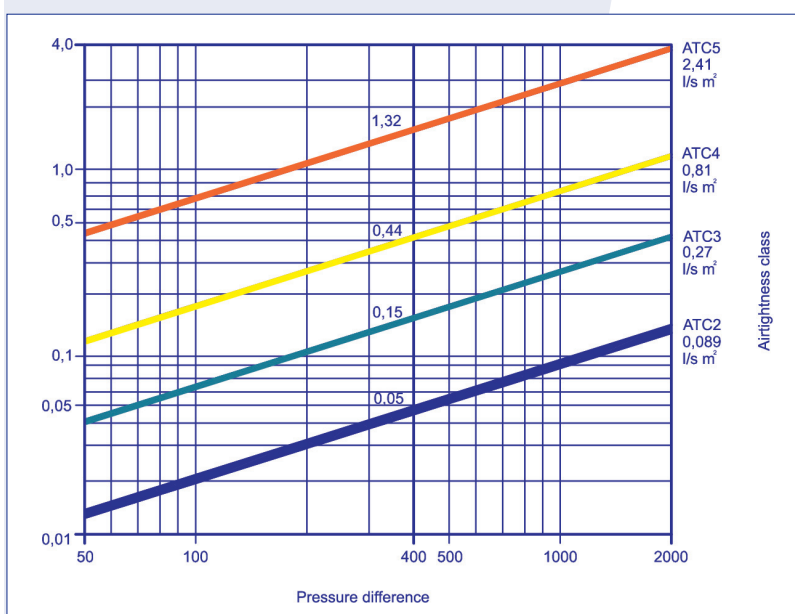

## Products in the KEN-LOK program

*KEN-LOK fittings*

- Double lip rubber seal at each side of the fitting
- Diameters Ø80 - Ø1250 mm (incl. non-CEN- diameters)
- Rigid construction, no sharp edges due to 'Soft-Edge' (rolled over edge)
- Standard in galvanized steel, stainless steel on request

***A ventilation system installed with KEN-LOK fittings complies to air tightness class ATC2 and is easy to install***

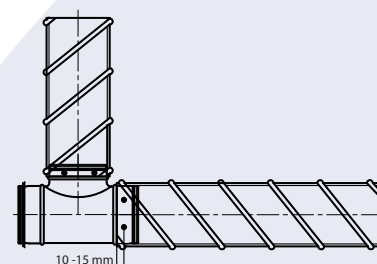

Current class	Former class	Leakage factor	Max test pressure (Pa)
ATC5	A	0.027	500
ATC4	B	0.009	1000
ATC3	C	0.003	1000
ATC2	D	0.001	2000

## Through the KEN-LOK program quicker installation and less mounting material

- Quick and easy installation
- Easy to adjust even during the installation by turning the fitting
- Less mounting material (*no tape*)
- A dry and clean surface is no longer a necessity (*no tape*)
- Easy installation (especially in hard to reach locations)
- Ideal for visible places

## KEN-LOK high-quality ventilation fittings

These are the international standards that our ventilation products comply with:

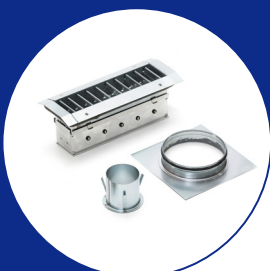

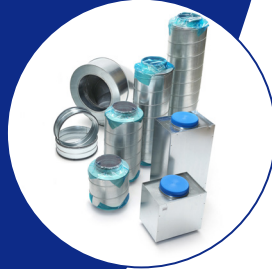

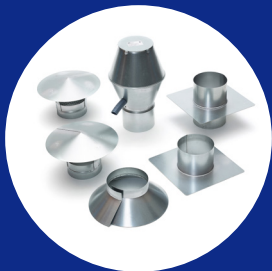

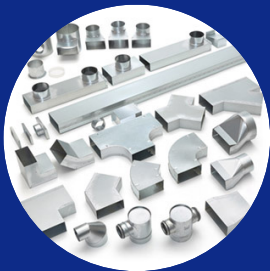

- *Fittings*  
NEN-EN 1506:2007 - NEN-EN 12237:2003 - NEN-EN 10346:2015
- *Dampers*  
NEN-EN 1506:2007 - NEN-EN 10346:2015 - NEN-EN 1751:2014
- *Silencers*  
NEN-EN 1506:2007 - NEN-EN 7235:2009 - NEN-EN 10346:2015  
NEN-EN 15727:2010

## Sustainable production for a healthy and comfortable living environment

We are proud of the fact that we, as a manufacturing company, became one of the first organisations in the ventilation sector to obtain a CSR certification in 2013, in accordance with the assessment criteria drawn up by the Metaalunie MVO-monitor (basis ISO 26000).
