

AIR  
SPIRALO®

VENTILATION DUCTS & FITTINGS

**RSD**

## Rectangular polyester silencer

### Application

It is commonly accepted that 30dB(A) is the upper limit for noise pollution in housing but dynamic sound (rustle) and noise caused by air handling units, fans, diffusers or other components in a ventilation system can be higher than 30dB(A).

### Prevention

Air Spiralo manufactures a complete serie of circular and rectangular silencers with circular connections and bends, all with a very low aero-dynamic resistance and unrivalled sound attenuation.

### Unique features

- Highest possible sound attenuation combined with very low resistance
- Pressure loss circular silencer: same value as for standard duct with identical length
- Specially formed inner tube for highest sound attenuation
- Tested by an independent laboratory according to ISO 7235
- Innovative construction of inside and outside shell ensures no contactor noise
- Ideal aero-dynamics profile by the absence of corners and borders
- Low building height
- Openable or closed (standard) models
- Easy to clean with brushes, no sharp edges or dust pockets
- Standard insulation thickness 50 mm. Other thickness on request.
- A retaining fiber cloth prevents any particles entering the current of air
- KEN-LOK connections with rubber seal
- Air tightness class ATC2
- Sendzimir galvanized steel. Other lengths and/or material on request.

## Order code:

RSDP012.030.11K

RS = Rectangular silencer  
 D = Polyester  
 P = Perforated straight tube, F = Perforated formed tube  
 012 = Diameter  $\varnothing 125$  mm  
 030 = Length 300 mm, 060 = 600 mm, 100 = 1000 mm  
 11 = Closed model, 12 = Openable model  
 K = KEN-LOK rubber seal

## Dimensions RSD, closed model (11) / openable model (12)

RSD-type	Dimensions (mm)						Attenuation $\Delta L$ (dB) / Octaves (Hz)							
	$\varnothing d_1$	$l_1$	$l_{p1}$	$a_1$	$b_1$	$b_2$	63	125	250	500	1000	2000	4000	8000
